Attention: Mr. Frank Marasco

Dear Frank:

Validation Confirmation- Re Status of 2013 Preliminary Economic Assessment for the Record Ridge Industrial Mineral (RRIM) Project number 183200.020

This letter was prepared in response to an inquiry by West High Yield (W.H.Y.) Resources concerning the continued validity of the Preliminary Economic Assessment (PEA) prepared by SRK Consulting (Canada) Inc. (SRK) dated May 31, 2013, and filed on SEDAR June 4th, 2013. Specifically, your inquiry was directed at whether the resource estimate published in the 2013 PEA Report remains valid.

Given the fact that no mining has taken place at the property, as confirmed by a site visit by SRK, that no revised resource estimate has been produced, and no additional drilling has been completed, I can confirm that the resource estimate presented in the 2013 PEA, with 43 million tonnes (Mt) measured and indicated, grading 24.6% Mg (40.6% MgO) for a total contained Mg of 10.59 Mt, as both current and valid.

I trust that this validation response addresses your inquiry and requirement to confirm validation of the PEA resource as originally authored and signed by SRK representatives:

- Bart Stryhas, PhD, CPG,
- Bret Swanson B Eng Mining, MAusIMM, MMSAQP,
- Corby Anderson, PhD, C Eng, FICChemE, FIMMM, MMSAQP.
- Arlene Laudrum, PGeo,

Sincerely,
SRK Consulting (Canada) Inc.

Soren Jensen, PEng, MEng.
Principal Consultant
